

# KELLEYS ISLAND SANITARY IMPROVEMENTS PROJECT NOTICE

## MESSAGE FROM THE VILLAGE

September 2024

K.E. McCartney & Associates (KEM) was recently selected by the Village of Kelleys Island to be the engineer for a sanitary improvements project. The Village and KEM will be providing a project update on a quarterly basis as part of our effort to keep Village residents informed regarding the status of the planning for our sanitary improvements. This newsletter will be posted on [Kelleyisland.us](http://Kelleyisland.us) and mailed with water bills for Island Residents.

*- Mayor Ron Ehrbar*

## UPCOMING WORK

The first step in the planning & design process will be conducting a survey of potential service areas on the island. KEM will start the surveying process in October. You can expect to see KEM surveyors using GPS equipment, along with an aerial LiDAR drone which will be collecting imagery and X,Y,Z coordinates of data points throughout the project area. These data points and aerial imagery will then be used to produce a 3D model for the planning and design phases of the project.

## ESTIMATED PROJECT STEPS
